## AIM & SCOPE

Renewable and sustainable energy Book series aims to bring together leading academic scientists, researchers and research scholars to publish their experiences and research results on all aspects of Renewable and sustainable energy. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the specified fields. High quality research contributions describing original and unpublished results of conceptual, constructive, empirical, experimental, or theoretical work in all areas of Renewable and sustainable energy are cordially invited for publication. Authors are solicited to contribute to the book series by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the following areas, but are not limited to

Solar Energy  
Wind Energy  
Sea Power  
Hydroelectric Power  
Thermal and Recycling  
Biomass  
Command and control systems for RE  
Eco-Design  
Transportation generation  
Distribution Power System  
Batteries and energy storage  
Energy harvesting  
Renewable energy for IT equipment  
Green technology
