# Call for Chapters

## Recent Trends in Computational Intelligence, Soft Computing and Communication Networks

### Aim & Scope

There have been a number of research advances in the fields of Computational Intelligence, Soft Computing and Communication Networks in recent years. Artificial and computational intelligence continues to transform all aspects of society including the use of green computing for sustainability, the modelling of intelligent healthcare systems, the design of smart transportation networks and the modelling of autonomous, intelligent, mobile vehicles. Computational intelligence and soft computing approaches possess a number of critical strengths: they are capable of processing large amounts of real-time and historical data acquired via environmental interactions; they continually learn through the consequences of action–result combinations; tools from a number of branches of soft systems science can be used together for synergistic effects to transform our society. All aspects of Computational Intelligence, Soft Computing, Communication Systems and Networks will be considered in this book.

### Authors Guidelines

Authors can submit the manuscript with single column in M S Word format. All the submission will be done through the IIPProceedings submission process.

Font style Times New Roman. Refer "IIP Chapter" format at download in IIP Website

Chapter pages will be in between 20 to 35 page including references, and acknowledgement.

Every author have to register yourself on IIPProceedings.

### Chapters of Interest but certainly not limited to:

1. Soft, mobile-cloud based computing for social networks
2. Data mining and Big data analytics for applied science and engineering
3. Fuzzy system theory in health and environmental applications
4. Socio-environmental data analytical approaches using computational methods
5. Deep learning and machine learning algorithms for industrial applications
6. Intelligent techniques for smart surveillance and security in public health systems
7. Crowd computing-assisted access control and digital rights management
8. Evolutionary algorithms for data analysis and recommendations
9. Crowd intelligence and computing paradigms Computer vision and image processing
10. Parallel and Distributed Computing Cloud computing and networks
11. Networked control systems and information security
12. Speech/image/video processing and communications
13. Green computing and internet of thing
14. Social Media Platforms, Tools, and Applications

### Chapter submission procedure:

Step 1: Go to IIP website [www.iipproceedings.org](http://www.iipproceedings.org)

Step 2: Register in the portal by clicking on Signup

Step 3: You can submit chapter at your dashboard or directly through IIP website after you login

Step 4: Click on "submit chapters"

Step 5: Select the book series title along with Book Series ID "EDITOR ID: IIPER-1658308382" to which you wish to submit.

Step 6: Upload all necessary details along with your chapter in word file format. Refer "IIP Chapter format" at download in IIP Website.

**For any queries**

**Contact: +91-9651644424**

**Mail us: [sumit.kushwaha1@gmail.com](mailto:sumit.kushwaha1@gmail.com)**

**Registration fee:** USD 40 INR.2000/- which includes processing fee with all above mentioned supporting services, Certificate hard copy to all authors, one complimentary copy of the book series per registration.
