## Research Trends in Computing Paradigms

### Aims and Scope:

The aim of "Research Trends in Computing Paradigms" is to provide a timely and comprehensive exploration of the cutting-edge advancements, emerging paradigms, and evolving directions within the field of computing. This seeks to offer readers an in-depth understanding of the latest trends and developments, bridging the gap between theory and practice, and fostering interdisciplinary dialogue among researchers, professionals, and students, ultimately contributing to the continued growth and innovation in the ever-evolving landscape of computing paradigms. The scope of "Research Trends in Computing Paradigms" encompasses a wide-ranging examination of the most current and emerging trends in the field of computing, encompassing areas such as artificial intelligence, machine learning, quantum computing, distributed systems, cloud computing, and beyond. This aims to present state-of-the-art research, practical applications, and their potential impacts on industries and society, fostering a holistic understanding of the dynamic computing landscape. It also serves as a valuable educational resource and reference for those seeking insights into the future directions and interdisciplinary intersections of computing paradigms, with contributions from leading experts worldwide.

### List of Topics :

1. Cloud Computing
2. Fog Computing
3. Grid Computing
4. Edge Computing
5. Quantum Computing: The Next Frontier
6. Internet of Things
7. Federated Learning: Collaborative AI Without Centralized Data
8. Computing for Sustainability: Eco-Friendly Solutions for a Greener Future
9. Cybersecurity Trends: Threats and Solutions
10. Global Perspectives

### Author Benefits:

1. Selected chapters (not all) will be indexed in RSquareL and other indexing platforms including Amazon, Google Books etc.
2. Publication of chapter in book series with ISBN / ISSN
