Pharmaceutical Science in Future Drug Discovery

Aim & Scope:

The aim of the book " **Pharmaceutical Science in Future Drug Discovery** " is to present high-level research characterized by scientific rigor, offering the potential to advance the field. Book chapters may cover various aspects of natural product research related to Drug Discovery and Design, Drug Delivery, Drug Action, Clinical Sciences, Drug Analysis, Cost Effectiveness of Medicines, and Regulatory Affairs, as well as agents or topics related to natural product drugs (e.g., semi-synthetic derivatives).

Specific research areas within the scope of the book include:

Discovery of novel bioactive chemicals from natural sources (including herbal medicines, marine organisms, and microorganisms)
Structural modification of bioactive natural products and structure-activity relationship studies
Quality control of herbal medicines
Pharmacology, pharmacokinetics, toxicity, and clinical studies of natural products and herbal medicines
Biosynthesis and biocatalysis of natural products
Studies on complex herbal extracts must characterize their chemical composition (e.g., HPLC fingerprinting analysis or quantization of major compounds). This is important for other researchers to replicate the results.

The "**Pharmaceutical Science in Future Drug Discovery**" book accepts various forms of submissions, including book chapters, research articles, reviews, perspectives, and short communications.
