Current Trends in Environmental Chemistry

Aims and Scope:

Current Trends in Environmental Chemistry (CTEC) is devoted to publishing articles of the rapid changes and development in the field of environmental chemistry. CTEC provides coverage of the novel and innovative use of methods for the investigation of environmentally relevant substances and problems. Topics of interest contain critical updates on the improvements in environmental chemistry, achievements and challenges of modern techniques and possible future developments in the specific fields, waste management, determination of trace atmospheric constituents of anthropogenic and natural origin, detection and identification of organic pollutants in water, soil and biota, determination and speciation of heavy metals and radionuclides in the environment, environmental references materials; method validation and chemometrics, interfacial studies involving media such as soil, sediment, water, air, organism, and food; green chemistry, environmentally friendly synthetic pathways, and alternative fuels; ecotoxicology and risk assessment in environmental analysis. Recent issues have included studies of the pore structure and surface chemistry of active carbons, discussions of the applications of the adsorption.

List of Topics:

We welcome other than theme based topics with novelty, social vitality and environmental importance which will make the book more glorious.

Author Benefits:

1. Selected chapters (not all) will be indexed in RSquareL and other indexing platforms including Amazon, Google Books etc.
