# Call for Chapters

## Fiction to Reality: Unveiling Climate Change in Literature

### Aims and Scope:

Urbanization and modernization have greatly influenced the interaction between man and environment in the recent times. Man's ability to exploit nature and her resources indiscriminately is responsible for the environmental crisis of the planet Earth. The excessive consumption of scarce resources, huge amount of garbage, ozone layer depletion, and various types of pollution and extinction of species are among the major environmental problems. Climate fiction gives insight into the ethical and social ramifications of this unparalleled environmental crisis, reflects on current political conditions that impede action on climate change, explores how risk materializes and affects society, and finally plays an active part in shaping our conception of climate change.

### List of Topics :

- Ecology
- Environment
- Climate Change
- Eco-poetics / Green Voices
- Anthropocene
- Nature-Culture Dichotomy
- Deep Ecology
- Climate Refugee/Migration
- Socio-Economic aspects of Climate Change
- Sustainable Development
- Post-Colonial Environments
- Green Politics
- Endangered Landscapes
- Transcendentalism
- Environmental History
