Renewable Energy and Green Chemistry

Aims and Scope:

Renewable energy and green chemistry Book series aims to bring together leading academic scientist, researcher and research scholars to publish their experiences and research result on all aspects of Renewable and Sustainable energy. It also provides a premier interdisciplinary platform for researchers, practitioners' and educators to present and discuss the most recent innovation, trends, and concerns as well as practical challenges encountered and solutions adopted in the specified fields. High quality research contribution describing original and unpublished results of conceptual, constructive, empirical, experimental, or theoretical work in all areas of renewable and sustainable energy are cordially invited for publication. Authors are solicited to contribute to the book series by submitting articles that illustrate research results, projects, surveying work and industrial experience that describe significant advance in the following areas, but are not limited to

List of Topics:

- Solar Energy
- Wind Energy
- Sea power
- Thermal and Recycling
- Biomass
- Command and control system for RE
- Eco- Design
- Transportation generation
- Distribution power system
- Batteries and energy storage
- Energy harvesting
- Renewable energy for IT equipment
- Green technology
- Hydrogen energy storage
- Energy efficiency
- Smart Grid
- Water, food and energy nexus
- PV and Water pumping
- Green Chemistry

Author Benefits:

1. Selected chapters (not all) will be indexed in RSquareL and other indexing platforms including Amazon, Google Books etc.
