## Call for Chapters

# Advances in Communications, Signal Processing and Embedded Systems

### Aims and Scope:

Advances in Communications, Signal Processing and Embedded Systems book provides a premier interdisciplinary platform for researchers, practitioners and educators to publish not only the most recent innovations, trends and concerns but also practical challenges encountered and solutions adopted in the fields of communications, signal processing and embedded systems. The book will provide an excellent international forum for sharing knowledge and results in theory, methodology and applications of communications, signal processing and embedded systems. This book will include significant contributions to all major field of the communications, signal processing and embedded systems in theoretical and practical aspects. It provides a platform to the researchers and practitioners from both academia and industry to meet and share cutting-edge development in the field. Authors are solicited to contribute to the book by submitting articles that illustrate research results, projects, surveying works and industrial experiences that describe significant advances in the following areas, but are not limited to:

### List of Topics :

- Communication Networks
- Wireless Communications
- Mobile Communications
- Optical Communications
- Internet of Things (IoT)
- Signal Processing
- Machine Learning
- Artificial Intelligence
- Embedded Systems
- Microcontroller Based System Design

### Author Benefits:

1. Selected chapters (not all) will be indexed in RSquareL and other indexing platforms including Amazon, Google Books etc.
2. Publication of chapter in book series with ISBN / ISSN
